FENCES

Property must be recently surveyed.

Fence cannot be over six (6) feet high and four(4) feet in front of the residence as not to obstruct view for safety purposes.

Post side of fence must face owners property.

A fence is considered an accessory structure and must be maintained as such, structurally sound and in good repair.

It is recommended that the fence be erected six (6) inches off the property line.

A Zoning Permit is needed before work can be done and a drawing of the proposed fence must be filed with the Zoning Officer.
